

STUDIO KRISTEN WHITTLE

TEAM CV

VLADIMIR SAZUNIC DIP(ARCH) RAIA

Birthplace

Zagreb, Croatia

Citizenship

Australian Citizenship

Education

Dipl.Ing.Arch., University of Belgrade,
Yugoslavia, Faculty of Architecture

Professional Associations

Member of the Australian Institute of Architects AIA
Former member of the Kuwait Society of Engineers
Registered Architect ARBV

Licences

VIC ARBV Registration Number 14764

Professional Experience

Vladimir has extensive international and domestic (Australian) experience in architectural design, contract administration, construction/project management and property development. He has travelled extensively throughout the world and is able to adapt and work with different cultures in a multi-disciplined environment. This includes corporate environment as well as running and managing one's own private professional practice.

After migrating to Australia in April 1991, through private interdisciplinary design practice, designed and developed residential properties in Melbourne's premier residential areas. Designed residential, commercial and retail projects and interiors for clients in Melbourne. The aim of the practice is to produce work that responds to its context and delivers innovative architecture and interior design solutions of highest standard.

Past experience of eleven years in the Middle East related to work for and in collaboration with major international consulting, construction and A/E firms. Functioned as projects coordination manager, directly responsible to the managing director of a major international contracting company and in this senior executive role involved in the construction of large scale and some of the most prestigious commercial building projects in Kuwait. Prior to that, worked in Baghdad, Iraq for nearly a year and a half on a massive design-construct petrochemical complex near the capital city.

Designed private houses for clients in Kuwait, Cyprus, Kashmir (India), Greece as well as interiors for executive offices in Hong Kong.

Synopsis

High levels of design creativity and imagination including understanding of engineering principles and capabilities.

Through years of experience developed particular attention to design/construction detail.

Keen interest in built environment and the dedication to deliver projects to the highest professional standards, while understanding the financial and business side of architecture and design, project delivery/construction process, including property development.

Ability and experience to work in diverse cultural, social and geographical environments.

Excellent presentational ability and negotiating skills.

Preparation and submission of tenders/proposals.

Contract administration and project management.

Preparation, evaluation, submission, negotiation and settlement of contractual disputes and claims.

Extensive experience in managing large construction projects as per the international conditions of contract for civil engineering and construction works; Federation Internationale des Ingenieurs – Conseillers (F.I.D.I.C.).
